Application/Control Number: 10/065,975

Art Unit: 2836

The following is an Examiner's Statement of Reasons for Allowance: Applicant's arguments of 5/19/2004 have been carefully considered and deemed persuasive. Specifically those arguments appearing in the 2<sup>nd</sup> and 3<sup>rd</sup> paragraphs found on Page 6 of the Response, have been carefully considered in view of Lang et al. (5,521,482), which was relied upon in the previous art rejections of Independent Claims 1 and 23. The Examiner agrees that system conditions and electrical signatures are different for "start-up" and "in operation". The Examiner has found another Reference, Leon et al. (5,519,300), which contains many of the same Figures found in the Lang et al. Reference, but does not appear to discuss analysis at "start-up". A careful comparison of the two References (having same assignee and one common inventor), yields that much of the Specification of Leon et al. is identical to that of Lang et al., except for the added passages referring to "start-up" and except for the text drawn to Figures 7A-10B found only in Lang et al.. It is the opinion of the Examiner that both Lang et al. and Leon et al. are drawn to the gathering of voltage and current samples, which could be used to determine reactive power indicators, during a "start-up" time and prior to "steady-state" condition, and as such, do not anticipate nor suggest the claimed combinations found in the Independent Claims being limited to (i.e. Claim 1) "simultaneously sampling voltage and current data of an induction machine in operation" (emphasis added), determining an indicator of reactive power and then determining an internal motor

fault from the indicator. Reasons for Allowability of the remaining Claims can be found in the Office Action of 3/18/2004.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ronald W Leja whose telephone number is (571)272-2053. The examiner can normally be reached on Monday thru Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Sircus can be reached on (571)272-2800. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
